Re: Gaylord High School Existing Building Commissioning Services

Dear Mr. Jeffries:

I am writing to let you know that we appreciate Synergy Engineering Consultants' effort on the Gaylord High School Existing Building Commissioning project that was recently completed.

Synergy's staff, in particular Hans Nelson and Nic Ruehmeier, were both responsive to our project needs and worked well with our team. Our project team originally selected Synergy based upon their extensive experience with Commissioning services, which was evident from the on-site functional testing that Mr. Ruehmeier performed. We were impressed with the end product deliverable, a commissioning report that includes detailed results of the functional tests, which will be very useful to the Owner and our design team in resolving the many deficiencies discovered by Synergy throughout the Commissioning process.

It was a pleasure working with both Hans and Nic, and I look forward to future opportunities to work with Synergy Engineering Consultants.

Sincerely,

Wade Trim, Inc.
